

PRESS RELEASE

› A new CE and FDA certified hose for PCM Delasco™ peristaltic pumps

Specially designed for the food industry, a new food grade hose is available for PCM Delasco™ DL and DSC series. The part in contact with the fluids is white. Engineered for high pressure applications, it can be Cleaned In Place and complies with CE1935/2004 and FDA 21 CFR177.2600.

With an outstanding mechanical resistance it provides superior hose life compared with standard nitrile and brings performances, food safety compliance and low life cycle costs together.

Ideal for the transfer and the dosing of fragile, abrasive, viscous fluids or fluids containing solids, the PCM Delasco™ peristaltic pumps can run dry without causing any damages. The hose is the unique wearing part and the unique part in contact with the pumped fluid. Without dynamic seal, the PCM Delasco™ pumps combine performances, food safety and low life cycle costs.

About PCM

Founded in 1932 by René Moineau, the inventor of the Progressing Cavity Pump, and Robert Bienaimé, from Gévelot Group, PCM is today one of the world's leading manufacturers of positive displacement pumps and fluid-handling equipment.

Our specialty is developing solutions for the lifting, transfer, dosing, mixing and filling of abrasive, fragile, viscous, corrosive, hot or heavy products. Present around the world, we provide solutions to three main sectors: Oil & Gas, Food and Industry.

PCM is divided into four clusters and has more than 20 branches and subsidiaries worldwide, gathering about 600 employees from 35 different nationalities. PCM continues to evolve to be closer to its customers by opening new subsidiaries: PCM Group Australia Pty Ltd in April 2013, LLP PCM Kazakhstan in July 2013 and recently PCM Chile Spa in April 2014.
