

# SURFACE PUMP SERVICE

PCM TRUSTED EXPERTS ALWAYS READY  
TO SUPPORT YOUR OPERATIONS

keep it moving 

Benefit from PCM's expertise and experience in PCP Surface Pumping Systems. We have a worldwide network to support your operations. Our workshops are spread across 5 continents, and we can serve your operations with responsive specialists with the highest HSE industry standard.

## » BENEFITS

- **Optimization** - PCM laboratories can test onsite fluid for best pump performance
- **Spare Parts Management** - ensure enough stock of necessary spare parts
- **Installation, Commissioning & Start-up** - assist on-site or remotely
- **Maintenance & Repair** - minimize downtime on any components of your system
- **Upgrades** - adapt to any operational change throughout the life of your project
- **Training & Troubleshooting** - PCM Specialists are ready for live online or on site support

### » 1 - OPTIMIZATION

A key factor for smooth operations and optimal pump run life, is elastomer compatibility with actual onsite fluid conditions. PCM laboratory service can test your fluid characteristics in order to determine the best elastomer and rotor / stator selection.

### » 2 - SPARE PARTS MANAGEMENT

PCM can manage stock specifically tailored for your project to ensure short lead times and avoid disruption of your operations.

### » 3 - INSTALLATION, COMMISSIONING & START-UP

Whether your facilities are onshore or offshore, PCM experts are onboard with you to attend critical phases of your projects.

**PCM**

keep it moving

### 4 - MAINTENANCE & REPAIR

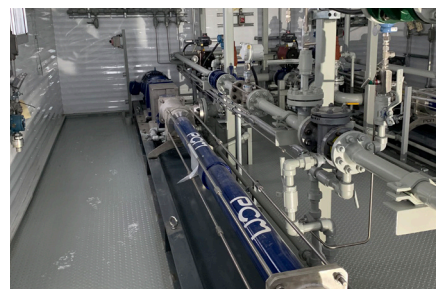

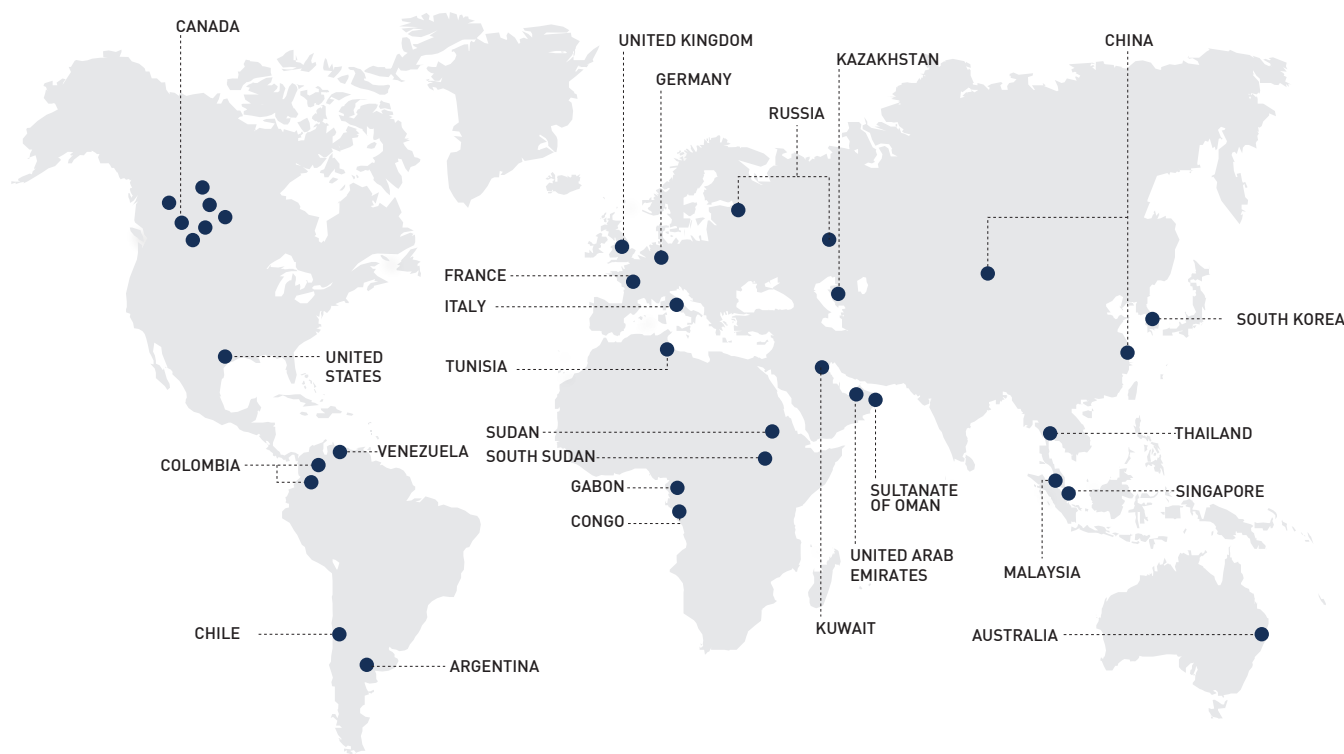

PCM tools and procedure can assess failed equipment and identify root-cause failure through in-depth analysis of your process and operations. PCM can repair any make of progressing cavity pumps.

### 5 - UPGRADES

Has your process changed, or your installation needs a revamping? PCM engineers will help you utilize the most of the components of your current pump to match the new conditions and minimize cost.

### 6 - TRAINING & TROUBLESHOOTING

PCM can support and train your field staff for any intervention by providing specific instructions continuously through the intervention using real-time video links with PCM experts.
